

⇒ CCB-200

Super-Strenght Multi-Purpose Cleaner / Degreaser for Mechanical Parts

Description

PROLAB's CCB-200 is a super-strength multi-purpose cleaner/degreaser with exceptional properties resulting from its active ingredients concentrated formula.

Characteristics and Benefits

The CCB-200's super-strength multi-purpose formula works efficiently in three distinct stages: it powerfully degreases, thoroughly cleans and controls moisture.

The CCB-200 is particularly effective on electrical parts such as starters, alternators and switches as well as on carburetors and brake parts (for noise reduction). It can also be used for thorough cleaning of drive chains (motorcycles, ATVs, bikes, etc.). The CCB-200 is practical: it is available in liquid form and aerosol.

Types of Application

The CCB-200 super-strength multi-purpose cleaner/degreaser is a must for all workshops, particularly engine shops and machine shops.

Directions for Use

Apply or spray CCB-200, let work, then wipe.

Warning

When using CCB-200 it is recommended to use gloves. Wear a mask, wear safety goggles and avoid prolonged skin contact. Do not apply on an electric motor when in use. Liquid CCB-200 containers must be tightly sealed.

Available Sizes

Liquid: 20 L, 55 L, 205 L

Spray: 418 gr

Product Codes

790: Liquid

790460: Spray

Caractéristiques	Test ASTM	Valeurs typiques CCB-200
Flash point (aerosol):		25 to 45 cm flame extension
Flash point (liquid):		25°C
Boiling point:		56°C
Specific gravity at 15°C:	D4052	0,76 gr/cm ³
Volatility:		100%
Color:		Clear
