Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

Section 7. Handling and storage

Precautions for safe handling

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Ground and bound container and receiving equipment. Use explosion-proof equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Do not breathe dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

Section 8. Exposure controls/Personal protection

Control parameters (biological limit values or exposure limit values and source of those values)

Exposure limits: CAS 67-56-1 - ACGIH - TLV-TWA 200 ppm & TLV-STEL 250 ppm & PEL-TWA 200 ppm.

Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 10. Stability and reactivity					
Reactivity					
Does not react under the recommended storage and handling conditions prescribed.					
Chemical stability					
Stable under the recommended storage and handling conditions prescribed.					
Possibility of hazardous reactions					
Accumulation of flammable/explosive vapours.					
Conditions to avoid (static discharge, shock or vibration)					
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take action to prevent static discharges.					
Incompatible materials					
Oxidizing materials; acids; etc.					
Hazardous decomposition products					
None known					

Section 11. Toxicological information

Section 11. Toxicological information				
Information on the likely routes of exposure (inha	lation, ingestion, skin and eye contact)			
Toxic if swallowed. May be harmful if swallowed and enters airways. Causes mild skin irritation. Causes serious eye irritation. May cause				
drowsiness or dizziness. Causes damage to organs.				
Symptoms related to the physical, chemical and toxicological characteristics				
	on, redness, tearing; Respiratory tract irritation, coughing, shortness of breath, dizziness,			
drowsiness, nausea and headaches.				
Delayed and immediate effects (chronic effects fro	om short-term and long-term exposure)			
Skin Sensitization – No data available;				
Respiratory Sensitization – No data available;				
Germ Cell Mutagenicity – No data available;				
Carcinogenicity – No ingredient listed by IARC, ACGIH, NTP or OSHA;				
Reproductive Toxicity – No data available;				
Specific Target Organ Toxicity — Single Exposure -	- Central nervous system & lungs, liver and kidneys;			
Specific Target Organ Toxicity — Repeated Exposur	re – No data available;			
Aspiration Hazard – Unlikely, but possible;				
Health Hazards Not Otherwise Classified - No data a				
Numerical measures of toxicity (ATE; LD50 & LC				
	halation - Rat - 4 h – 128 mg/l; LD50 Dermal - Rabbit - 17100 mg/kg			
ATE not available in this document.				
	Section 12. Ecological information			
Ecotoxicity (aquatic and terrestrial information)	$Toxicity to fish mortality LC_{50} - Lepomis macrochirus (Bluegill) - 15400 mg/l - 96 h Toxicity$			
	to daphnia and other aquatic invertebrates EC50 - Daphnia magna (Water flea) - > 10000			
	mg/l - 48 h Toxicity to algae EC50 - Scenedesmus capricornutum (fresh water algae) - 22000			
	mg/l - 96 h			
Persistence and degradability No data availa	ble			
Bioaccumulative potential No data available				
Mobility in soil No data available				
Other adverse effects No data available				
	Section 13. Disposal considerations			
Information on safe handling for disposal/method				
	accordance with local, regional or national regulations.			
	Section 14. Transport information			
UN number; Proper shipping name; Class(es); Pa	cking group (PG) of the TDG Regulations			
UN1230; METHANOL; CLASS 3(6.1); PG II

UN1230; METHANOL; CLASS 3(6.1); PG II				
UN number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air)				
UN1230; METHANOL; CLASS 3(6.1); PG II				
Special precautions (transport/conveyance) Ma	y also be shipped as a LIMITED QUANTITY in accordance with TDG.			
Environmental hazards (IMDG or other) Nor				
Bulk transport (usually more than 450 L in capacity) Possible				
Section 15. Regulatory information				
	efer to Section 2 for the appropriate classification. This product has been classified in accordance ith the hazard criteria of the Hazardous Products Regulations (HPR).			
	Refer to Section 3 for ingredient(s) of the DSL			
Safety/health/environmental outside regulations specifics				
United States OSHA information: This product is regulated according to OSHA (29 CFR).				
United States EPA (Environmental Protection Agency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14.				
United States TCSA information: Refer to the ingredients listed in Section 3.				
National Fire Protection Association (NFPA):				
HEALTH: 1 FLAMMABILITY: 1 INSTABILITY: 0 SPECIAL HAZARDS: Refer to Section 2 & 3.				
HAZARD SCALE: $0 = Minimal$ $1 = Slight$ $2 = Moderate$ $3 = Serious$ $4 = Severe$				
California Proposition 65: This product may contain traces of a material known to the State of California to cause cancer or other reproductive harm.
