# Emergency telephone number/restriction on use Canada – CANUTEC 24 hour number 613-996-6666 Section 2. Hazard identification

## Classification of hazardous product (name of the category or subcategory of the hazard class)

Skin irritation (Category 3) Eye irritation (Category 2A)

Information elements (symbols, signal words, hazard statements and precautionary statements of the category/subcategory)

#### Warning

H316 Causes mild skin irritation.

H319 Causes serious eye irritation.

P264 Wash hands/nails/face thoroughly after handling. P280 Wear gloves/protective clothing/eye protection/face protection. P332 + P313 If skin irritation occurs: Get medical attention. P305 + P351 + P338 IF IN EYES, Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 If eye irritation persists: Get medical attention.

(following sentences not mandatory) P403 + P203 + P205 Store in a well-ventilated place. Keep container tightly closed. Keep cool. P501 Dispose of contents/container into safe container in accordance with local, regional or national regulations.

Section 3. Composition/information on ingredients   Chemical name (common name/synonyms)   CAS number or other   Concentration (%)	of contents/container into safe container in accordance with local, regional or national regulations.

	Special protective equipment and precautions for fire-fighters						
During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper							

## Section 6. Accidental release measures

protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without <u>risk</u>. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

#### Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

## Section 7. Handling and storage

#### Precautions for safe handling

Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

# Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

#### Section 8. Exposure controls/Personal protection

#### Control parameters (biological limit values or exposure limit values and source of those values)

Exposure limits: CAS 471-34-1 PEL-TWA – 15 mg/m<sup>3</sup> (total) & 5 mg/m<sup>3</sup> (respirable);

## Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

## Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 9. Physical and chemical properties					
Appearance, physical state/colour Tan grease	Vapour pressure Not available				
Odour Oil	Vapour density Heavier than air				
Odour threshold Not available	Relative density 1.02				
pH Not available	Solubility Negligible				
Melting/freezing point Not available	Partition coefficient - n-octanol/water   Not available				
Initial boiling point/range Not available	Auto-ignition temperature Not available				
Flash point 175 °C (ASTM D 92)	<b>Decomposition temperature</b> Not available				
Evaporation rate Not available	Viscosity 230 cSt @ 40°C (Base oil)				
Flammability (solids and gases) Not available	VOC Not available				
Upper and lower flammability/explosive limits Not available	Other None known				
C (1 40 C) 7 171 7 (1 1)					

## Section 10. Stability and reactivity

#### Reactivity

Does not react under the recommended storage and handling conditions prescribed.

#### Chemical stability

Stable under the recommended storage and handling conditions prescribed.

## Possibility of hazardous reactions

None known.

## Conditions to avoid (static discharge, shock or vibration)

None known.

# **Incompatible materials**

Oxidizing materials; etc.

## Hazardous decomposition products

None known

# Section 11. Toxicological information

Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)

Energy efficiency since 1985
Causes mild skin irritation. Causes serious eye irritation.

Symptoms related to the physical, chemical and toxicological characteristics

Skin irritation, redness, stinging, pain; Eye irritation, redness, tearing.

Delayed and immediate effects (chronic effects from short-term and long-term exposure)

Skin Sensitization – No data available;

Respiratory Sensitization – No data available;

Germ Cell Mutagenicity – No data available;

Carcinogenicity - No ingredient listed by IARC, ACGIH, NTP or OSHA;

Reproductive Toxicity – No data available;

Specific Target Organ Toxicity — Single Exposure – No data available;

Specific Target Organ Toxicity — Repeated Exposure – No data available;

Aspiration Hazard – No data available;

Health Hazards Not Otherwise Classified – No data available;

Numerical measures of toxicity (ATE; LD<sub>50</sub> & LC<sub>50</sub>)

CAS 471-34-1 LD<sub>50</sub> Oral - Rat - 6450 mg/kg;

ATE not available in this document.

Section 12. Ecological information

**Ecotoxicity (aquatic and terrestrial information)** 

No data available for the product.

Persistence and degradability No data available

**Bioaccumulative potential** No data available

Mobility in soil No data available

Other adverse effects No data available

Section 13. Disposal considerations

Information on safe handling for disposal/methods of disposal/contaminated packaging

Dispose of contents/container into safe container in accordance with local, regional or national regulations.

Section 14. Transport information

UN number; Proper shipping name; Class(es); Packing group (PG) of the TDG Regulations

NOT REGULATED

UN number; Proper shipping name; Class(es); Packing group (PG) of the IMDG (maritime)

NOT REGULATED

UN number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air)

NOT REGULATED

Special precautions (transport/conveyance)NoneEnvironmental hazards (IMDG or other)None

Bulk transport (usually more than 450 L in capacity) Possible

Section 15. Regulatory information

Safety/health Canadian regulations specifics Refer to Section 2 for the appropriate classification. This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations (HPR).

**Environmental Canadian regulations specifics** | Refer to Section 3 for ingredient(s) of the DSL

Safety/health/environmental outside regulations specifics

United States OSHA information: This product is regulated according to OSHA (29 CFR).

United States EPA (Environmental Protection Agency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14.

United States TCSA information: Refer to the ingredients listed in Section 3.

National Fire Protection Association (NFPA):

HEALTH: 1 FLAMMABILITY: 1 INSTABILITY: 0 SPECIAL HAZARDS: Refer to Section 2 & 3.

HAZARD SCALE: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe

California Proposition 65: This product may contain traces of a material known to the State of California to cause cancer or other reproductive harm.
